

The Pinfire Page, by Aaron Newcomer

Welcome to the new Pinfire Page! I hope to use this column to show pinfire related items that are interesting to me that I hope will be interesting to others as well. I plan to show individual cartridges, boxes, documents, and anything else I may come across.

This is the very first pinfire revolver cartridge. It was manufactured by the gun maker, **Jules Joseph Chaudun** around 1845.

15mm Pinfire Cartridge by the Parisian Manufacturer, **Benjamin Albert**.

The above three are Danish military cartridges made at **Københavns Tøjhus**. In English this would be "Copenhagen Arsenal." These first two were made for their pinfire revolvers that they named as Danish M/1861, M/1865 and M/1871 revolvers. It is unknown what specific gun the carbine-length cartridge was made for.

9mm, 7mm and 5mm pinfire cartridges by **Patronenfabrik J. Stahel** of Zurich, Switzerland.
